

TELENAV ASSET TRACKER™

Best in class technology for asset tracking applications

TeleNav Asset Tracker gives you visibility of mobile resources in the field, delivering increased operational control, reduced risk and lower costs. Whether you need to safeguard high value inventory in transit, keep tabs on expensive gear and tools, or improve asset utilization and reporting for improved bill backs, TeleNav meets your needs with hardware designed for specific applications.

Combining cutting-edge technology with a simple and reliable Web-based system, TeleNav delivers affordable, flexible and scalable asset management for any sized organization. A leader in location tracking and mobile workforce management, TeleNav stands behind its services with free, automatic upgrades and 24x7 customer support.

BENEFITS

- **Increase visibility and control** of high-value assets with a selection of easy-to-use, purpose-built tracking devices
- **Improve asset utilization and productivity** by knowing the exact location of each for fast, intelligent dispatch
- **Get near real-time alerts** when assets and shipments start in motion, enter or exit specific areas, or stop for long durations
- **Reduce theft** and improve recovery efforts
- **Deter unauthorized use** of valuable assets

SOLUTIONS

- **Select from a variety of purpose-built tracking devices**
- **Monitor asset location with TeleNav's award winning Web interface, featuring dynamic maps, data layers, custom map overlays and more**
- **Customize stop and location/geofence alerts**
- **Detailed historical activity reports**
- **Manage assets within same dashboard as mobile workers and vehicles using TeleNav workforce management solutions on cellphones and smartphones**

REQUIREMENTS

- **Monthly Service**
- **Internet Access**
- **TeleNav Asset Tracker hardware**
- **See individual device datasheets for specifications**
