

# U.S. Bank Voyager Fleet Card

The premier fuel and maintenance payment solution for Class 1 – 6 fleets

Far more than an ordinary fuel card, the U.S. Bank Voyager® Fleet Card provides fuel, maintenance and service capabilities that dramatically simplify fleet management for businesses that operate light duty automotive and truck fleets (Class 1 – 6 vehicles).

Companies in all industries can count on the Voyager Fleet Card to help reduce costs, prevent fraud and help their fleets operate more efficiently.

With the Voyager Fleet Card, you can:

- **Reduce** costs and control card usage with customizable purchase limits
- **Manage** all aspects of your program online, securely and conveniently
- **Save** with custom merchant discounts you create with fuel providers

The Voyager Fleet Card is a powerful tool that reduces costs and enhances control — and gives your business a competitive advantage.

“U.S. Bank Voyager Fleet Cards help provide the ability to handle a large portion of our supply, travel, fuel and vehicle maintenance expenses quickly and efficiently.”

— We Energies

## Welcomed at more than 230,000 locations across America

No matter where your vehicles are driven, your employees can depend on the Voyager Fleet Card for all their fuel and maintenance needs. Better yet, because it is powered by the Voyager network, it enables comprehensive usage tracking and 100% Level III transaction data capture.

## For organizations of all types, the Voyager Fleet Card helps fleets run more efficiently

visibility data  
fleet  
data manage ease reporting data  
bulk fueling acceptance reporting flexible  
cost savings reporting flexible  
reliability customer service

## Control. Value. Convenience. Get it all with the Voyager Fleet Card.

### CONTROL

**Purchase Control.** Assign cards to specific drivers or vehicles with a unique Personal Identification Number (PIN) for security. Drivers can be required to enter their vehicle number, driver number or PIN, along with their odometer reading. Purchases can be limited by transactions per day, week, month or bill cycle, total spend or other criteria.

**Industry-Leading Reporting Tools.** Tailor program reporting to your needs with customizable reporting options. These include exception monitoring, card usage, fuel type, odometer readings and virtually any other card transaction data.

**Direct Data Integration.** Seamlessly support existing business processes with direct data links with your existing fleet asset management, accounting and/or financial systems.

**U.S. Bank Fleet Commander® Online.** Observe, update, track and manage all fleet operations and fleet card accounts securely and conveniently, day or night. Customizable capabilities include access to robust reporting tools, real-time account maintenance including card cancellation and replacement and more.

### VALUE

**Merchant Discounts.** Enjoy special savings with this exclusive feature that allows fuel providers to set up discounts for U.S. Bank Fleet Card customers. Discounts can be based on a percentage of sales or cents per gallon.

**Nationwide Supplier Services.** Get preferred service and pricing from the National Automobile Club, Enterprise Rent-A-Car® and several nationwide auto glass replacement services.

**Customer Service.** Access outstanding customer service 24 hours a day, 365 days a year. All cardholders get direct access to a U.S. Bank representative when needed.

### CONVENIENCE

**TeleTrans.** Enjoy expanded acceptance of your Voyager Fleet Card beyond the Voyager Network with TeleTrans, which allows any service provider or fuel supplier to process transactions over the phone.

**Tax Exemption.** Ensure that all tax exemptions are handled efficiently and accurately. For government entities, U.S. Bank handles all tax exemptions through a proprietary process that strips all taxes when the transaction is posted.

**FuelForce® Bulk Fueling Services.** Gain greater control over your company's bulk fuel facility with FuelForce, a state-of-the-art solution that monitors, controls and creates greater efficiencies for any size fueling operation. It authorizes and controls fuel dispensing at multiple sites while collecting accurate fuel usage and vehicle data.
