

INDEPENDENCE PACKAGE[®]

Service Vehicle

Superior Mobile Power
Save Fuel
Reduce Emissions

Mobile Electric Power with Idle Reduction Capability

Energy Xtreme's Service Vehicle Series products are complete smart power management systems that operate a utility truck's auxiliary electrical loads, including beacon lights, radio, computer, camera and power tools, without having to engage the vehicle's engine.

Saves Money

Significantly reduces fuel cost, increases service life and warranty of the vehicle.

Safe

Crash-tested, non-hazmat, dry, solid state technology; recyclable.

Reliable

Power when and where needed, reduces dead batteries and works in extreme temperatures. Push button jump start ensures the driver is never stranded by a dead battery.

Easy-to-use

Plug and play smart system. Recharges when plugged into a dedicated 20A outlet, and off the alternator. No maintenance.

Reduces Emissions

Reduces CO₂, NO_x and greenhouse gas emissions by eliminating idling.

"I give Energy Xtreme's Service Vehicle Series a four star rating. I use the system on a daily basis."

- David Cook,
Public Works Dept, City of Irving.
